

CORPORATE PROFILE

OUR VISION

To be the Company of choice nationally and to be a strong global player in the areas of Electrical / Maintenance Engineering, Procurement, Oil and Gas and the Construction business.

OUR MISSION

To be the leader in providing innovative and excellent engineering and procurement solutions to clients locally and internationally while creating superior shareholder value.

We commit carrying out our business with easy sense of responsibility, integrity, and honesty and in accordance with the laws of Nigeria.

About Us

OMIROIL GLOBAL ENERGY LTD. provides a variety of Oil and Gas services. Our people are well trained and certified with dedicated mind to deliver quality services. Our equipments are always calibrated in order to ensure world class delivery, though we are smaller in size yet we have trusted relationships with many of the largest oil and gas companies in the world. Incorporated on 5th July, 2016, it has grown to become a major player in the Nigerian economy.

OMIROIL GLOBAL ENERGY LTD is recognized as a company with passion and dedication for innovation, technology and customer satisfaction. Customers all over the world affirm us on high performance, reliability and cost effectiveness.

Team OMIROIL GLOBAL ENERGY LTD has highly qualified and experienced Engineers, Business Developers, Administrators and trained professionals, which enable us to keep ourselves abreast with latest technology and deliver world-class products. With in-house Research and Development (R & D) blended with world best-practices, our customers are guaranteed to get cost-effective and high performance products with excellent service and technical support.

Our team is plugged in to technology's latest and greatest inventions to best serve our clientele with the most forward-thinking, future-minded spin on jobs. We are customer-focused and intent on quickly turning ideas into action. We are committed to being thorough first responders to your inquiries. After our initial conversation, we will prepare a proposal tailored to your company's goals and objectives. We will quickly proceed to outlining a budget and creating the perfect dream team to assist in the planning and execution of your job(s).

We pride ourselves on our knowledge of what's cool, new, and innovative. Our passion is to share our knowledge and resources with our clients to help make their job(s) unique, memorable and effective. We put together a team of our local experts, resources and newest technologies to achieve your target(s).

OMIROIL GLOBAL ENERGY LTD operates on a principle that whether it's on land, offshore or in the air, you deserve the platform to win.

Our approach is value added services, working closely always with our clients at the various phases of work category. Our human resources include seasoned, agile, ardent, talented and dynamic Engineers, Electricians, Equipment Operators, Administrators, from various walks of life. These professionals discharge their responsibilities with utmost zeal and determination in order to achieve optimum clients' satisfaction.

OUR OBJECTIVE/STRATEGIES

Objectives

OMIROIL GLOBAL ENERGY LTD overall objective is to create shareholder value.

Specific near term goals that should contribute to the achievement of this objective are as follows:

- To promote a culture of outstanding quality service and to be recognized as an industry leader in the area of quality.
- To maintain, as the cornerstone of our business, the health and safety of our employees and the protection of the Environment.
- To actively involve and empower all employees in a continuous improvement process.
- To listen and respond to our customers/stakeholders and exceed their expectations.
- To adapt quickly and appropriately to changing business conditions and market opportunities.
- Deliver quality projects to the satisfaction of our clients
- Deliberately manage company resources through waste avoidance and cost control
- Achieve tangible results and profitability for the benefits of all stakeholders

Strategies

To date, OMIROIL GLOBAL ENERGY LTD has used innovative and committed strategies in pursuit of its objectives.

- We operate large working interests in oil and gas properties, Construction and Maintenance Engineering.
- We focus on projects characterizing expandability, repeatability and sustainability
- We mitigate and manage risks of a smaller company in the oil & Gas industry, Construction and Maintenance Engineering with an integrated approach.
- We operate with financial discipline; maintain a high level of liquidity.

LOCAL CONTENT POLICY

1.2 LOCAL CONTENT POLICY

- Local Content Policy The Company is committed to the development of the local content policy by incorporating the plan into its business as part of her immense contribution to the sustainable development of Nigeria and project bearing communities in particular.
- Therefore in line with our community relations and social response and contracting policies, we have established the following principles: We shall utilize goods and services produced in Nigeria and project host communities in Nigeria, especially Niger Delta.
- The company shall continue to develop indigenous contractors and utilize local labour and locally manufactured materials wherever possible as enshrined in any contract policy. The company shall provide training to develop human capital and building competencies in the management field of sustainable local development.
- The company shall extensively ensure protection of environment, respect of human and social rights employee and contribution to local economic development

1.3 PROFESSIONAL STAFF

Bringing together professionals of various backgrounds to work as a team fosters creative thinking and innovation. Our project team accomplish multiple objectives by sharing expertise, yet remaining open to discover the most

efficient and effective methods of operation for particular project. The company work closely with industry respected engineers. With extensive experience on projects of various types and magnitude, we can and will provide timely responses to our customers' needs.

1.4 TECHNICAL CAPABILITIES

Operators, IOCs, OEMs and Government agencies are relying more upon the full service capabilities of experienced firms such as OMIROIL GLOBAL ENERGY LTD to provide and execute specialized technical services.

Our projects management expertise ranges from normal Civil Construction to technical services in hostile environments, requiring advance engineering technology in land and riverine area of Nigeria. We provide services at both levels with a technical emphasis on the land and marine environment.

Our services allow our clients to achieve maximum cost effectiveness by reducing the financial risk involved through cost management and by the reduction of the project cycle time through the utilization of manpower and materials/equipments. This enhances staff effectiveness, as well as reduces the overall project cost. We will accept projects with either a risk assumption or non-risk assumption based contract, whether the contract is fixed cost, performance incentive or traditional operator directed management.

At OMIROIL GLOBAL ENERGY LTD, the experience of talented people working together provides the technical innovation and engineering excellence required to achieve a high level satisfaction for our clients.

OUR SERVICES

OMIROIL GLOBAL ENERGY LTD has an innovative and strategic business services as highlighted below:

OMIROIL GLOBAL ENERGY LTD provides maintenance support to onshore and offshore operations and maintenance teams and our services include analysis and design services for facility and structural components, replacements, refurbishments as well as combination for execution.

These include feasibility studies, designing, construction and fabrication, installation, and maintenance works in the following areas:

- 1) Welding and fabrication
- 2) Corrosion Control
- 3) Maintenance works
- 4) Fabrication and Installation of Steel Structures and Masts

i) WELDING AND FABRICATION WORKS

OMIROIL GLOBAL ENERGY LTD

is involved in the following aspects of welding and fabrication activities:

- Design and erection of Support Structures for process industries

- Construction and laying of Oil and Gas Pipelines/Flowlines
- Design and construction of Tanks and Plumbing Systems
- Construction of Manifolds and Platforms.
- Fabrication of Production Jackets, etc.

ii) CORROSION CONTROL SERVICES

OMIROIL GLOBAL ENERGY LTD is involved in the following aspects of corrosion control activities:

- Blasting of corroded Structure/facilities
- Painting of Flow Station Structures and Facilities using
- Epoxy Paints/other corrosion Control Paints.
- Design and Installation of Cathodic
- Protection Devices
- Pipeline clearing (Pigging).
- Corrosion monitoring services.

●

iv) MECHANICAL MAINTENANCE SERVICES

- Maintenance of Pumps, Vessels and tanks
- Engineering certification of Cranes,
- Inspection, Preventative and Routine Maintenance/Breakdown Repairs.
- Provision of Mechanical Resource
- Personnel for Field Repairs Support.
- Maintenance of Power Generating Sets.
- Inspection, Preventative and Routine
- Maintenance/Breakdown Repairs of Compressors.
- Testing and Commissioning of Maintained Mechanical Equipment.

2.2 CIVIL, BUILDING AND CONSTRUCTION ENGINEERING:

Our services in this area cover the following:

- Land Surveying and Photogeometry,
- Development of sites, Access Roads and Earth Stabilization,
- Construction of Residential and Industrial Buildings,
- Construction of Roads and Highways, Construction of Surface/underground
- Drainage systems & Manholes,
- Construction of Curvets and Bridges,
- Construction of Overhead, Surface and
- Underground tanks/Water Supply Scheme Land Reclamation and Pile Foundation,
- Construction of Steel and Concrete Jetties,
- Buildings Renovation and Refurbishment,
- Civil and Building Works Implementation,
- Civil works for under Ground system Cabling,

2.3 ELECTRICAL AND INSTRUMENTATION ENGINEERING

Here, our services include:

- Interpretation of Electrical Engineering design
- Installation and Maintenance of Process control & Electrical Equipment, i.e. Generators, Instrument Control Panels, Battery Systems, etc.
- Cathodic Protection
- Industrial and Domestic Cabling & Tubing projects,
- High Tension Power Routes,
- Rural Electrification projects,
- Construction of Power Huts and Hook - Ups
- Installation of Earthing Systems, and
- Power and Earthing Systems Auditing
- Inspection, testing and commissioning of electrical & Instrumentation installations.

2.4 PROCUREMENT

Our procurement department understands the value of prompt delivery of correct specification hence utilizes her contact overseas for monitoring from raw material quality to process system to packaging and for expediting shipment. Comprehensive documentation of all test results and manual are also undertaken. Installation, instrumentation and maintenance of industrial machinery, spare parts, materials and chemicals. Over the years, we have established contacts with manufacturers of genuine machinery, spare parts and chemical and therefore can

help you shop for them at the most reasonable prices.

We undertake the following:

● Chemical	Sourcing
● Machinery	Expediting
● Spare Parts	Supply
● Labour	Management

2.5 OIL AND GAS TECHNICAL SUPPORT SERVICES

Field Supervision.

Manpower Supply / Service.

Consulting & Management Feasibility Studies.

Oil & Gas Equipment (Supply & Maintenance).

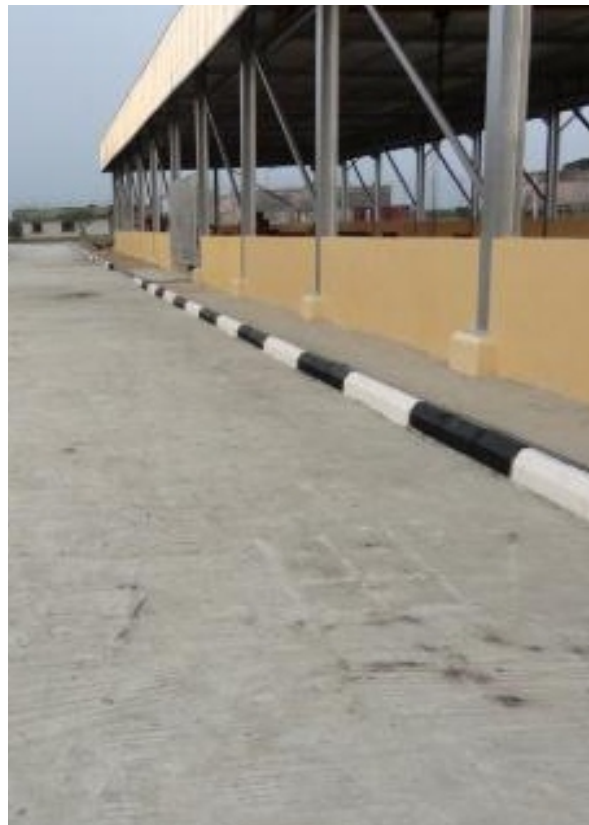

Contracting.

3.1 CORPORATE STRUCTURE AND STAFF STRENGTH

I) STAFF STRENGTH
